Artificial Intelligence 2: Games
Assignments List

Last update: 06.10.2026

Assignment 1 (10p). SA+A*Craft

In this assignment we will play A*Craft. All tasks assume online scenario, where the submitted program does not know the validators and has 1 second of computation time.

a) Deadlines: 14.10/21.10:

- (4p) Implement fully random search. Use evaluation function based on simulated game result.[1]

b) Deadlines: 21.10/28.10:

- (4p) Implement simulated annealing. Add some search space reduction optims.
- (1p) Reach better score than the `AI2Games` bot (7984 points).
- (1p) Reach better score than the `AI3Games` bot (8814 points).

Assignment 0 (0p). CG Summer Challenge

Participate in the CodinGame Summer Challenge 2026. Use any idea or algorithm to score as highly as possible on the leaderboard. Remember that your CG profile school has to be set to **University of Wrocław**.

Note that the contest game leaked quite a long time ago, and you can access it here.

Contest timeline: 07.09–21.09

- (+0.5p) Bonus points fo reaching Gold League.
- (+2p) Bonus points for reaching Legend League.
- Bonus points based on general ranking (not cumulative):
  Top 100 +1p, Top 75 +2p, Top 50 +3p, Top 25 +4p, Top 10 +5p.
- Bonus points for being in UWr representation (top 5 UWr): +3p.

[1] After the main deadline, I will release simulation code to ease the work for those who still want to catch up with the second part of the assignment.
